GRAIN AND SEED HEALTH AND QUALITY TESTING

Prices for analyses performed by the Department of Plant Pathology and Protection of t he Institute of Agriculture, Lithuanian Research Centre for Agriculture and Forestry

Address: Instituto al. 1, Akademija, Kėdainiai District
Contact: Laura Guobužaitė, Tel. +370 674 64 207

No.	Description of Analysis	Unit	Price without VAT, Eur	Price with VAT, Eur
1	Purity determination	1 sample	4,0496	4,90
2	Determination of impurities in grain	1 sample	4,9587	6,00
3	Viability and germination testing	1 sample	9,9174	12,00
4	Thousand-seed weight determination	1 sample	2,0661	2,50
5	Moisture content and quality parameter assessment using an Infratec rapid analyzer	1 sample	5,0000	6,05
6	Determination of internal pathogen infection	1 sample	12,3967	15,00
7	Determination of total pathogen infection	1 sample	10,7438	13,00
8	Determination of seed infection by pathogens causing crown and root rot using the filter paper roll method	1 sample	14,0496	17,00
9	Pathogen identification based on morphological characteristics	1 sample	18,1818	22,00
10	Pathogen identification by PCR method	1 sample	26,4463	32,00
11	Determination of deoxynivalenol (DON) by high-performance liquid chromatography (HPLC)	1 sample	81,9835	99,20
12	Mycotoxin determination by enzyme-linked immunosorbent assay (ELISA)	Minimum quantity: 7 samples	45,6612	55,25
13	Preparation of wheat bunt (*Tilletia tritici*) inoculum	2 g	7,4380	9,00
14	Small-scale seed treatment (seed dressing)	2 kg	4,1322	5,00
15	Identification of stored-product pests without special sample preparation	1 sample	37,1901	45,00

16	Complex pest identification requiring special sample preparation	1 sample	66,1157	80,00
17	Osmotic method for detection of pathogens of the genus Pyrenophora (stripe disease fungi)	Minimum quantity: 4 samples	7,4380	9,00
